

## **Karantis360 announced as Leading Innovators of Care Support Technology 2021**

7<sup>th</sup> Dec 2021 - Today, [Karantis360](#), an advanced remote patient monitoring and predictive care technology provider, has been awarded 'Leading Innovators of Care Support Technology 2021' by the [Southern Enterprise Awards](#) hosted by SME Awards.

For the fourth year running, Karantis360 has been acknowledged for its commitment to the social care sector by enabling vulnerable people to remain living independently in their own homes, in a safe, familiar environment, with the added support of assistive technology that gives peace of mind to both the VIP and their loved ones.

Karantis360, developed in partnership with IBM, provides an at-home monitoring and predictive care management solution, designed to transform the delivery of care for people with physical and mental health needs. Harnessing innovative AI technology with the use of discreet, remote sensors, wirelessly linked to a mobile device, which sends reports and alerts to carers, family members and a wider eco system where required, Karantis360 makes independent home living possible.

Helen Dempster, founder of Karantis360, has direct experience of how obtaining care for a loved one can be frustrating, having spent several years caring for members of her family and an adverse experience of a care home. Helen commented on the win, "We are thrilled to have won the SME Award for Leading Innovators of Care Technology 2021. I founded Karantis360 because my family and I struggled to find a suitable care solution for my grandfather. I believe that older and vulnerable people should be given freedom to choose where they live, and I think Karantis360 offers them that choice.

"It's proven that people live happier, healthier lives in their own homes. Even those with a Dementia diagnosis, given the choice, choose this option where they can live in a familiar environment, surrounded by people they know and their beloved pets if they have any. This award win is testament to Karantis360's capabilities and we want to continue to empower vulnerable people to make their own decisions about their future."

- ENDS -

### **About Karantis360**

A new development in assisted living; Karantis360 has been designed to transform the delivery of care for people with physical and mental health needs. Harnessing innovative technology, Karantis360 makes independent home living possible, and possible for longer, leading to happier and healthier lives. Reducing the admin burden for carers and increasing the levels of transparency for family members and providers, Karantis360 unites agencies, caregivers, clients and their families to benefit all.
